Lecturer: Prof.Valentin Schwind.

1. Introduction.

HIS-School management System

- HIS-School management system is an app that helps students and teachers to connect to the school's database and acquire simple information regarding their school work. For students, the information will be their id, their current scores, the classes they attended and their school schedule. For teachers, the information will then be their own info, the students' scores, the students that are attending the class and the schedule of said class. There are also a heap of functions that the teacher has, and a different access type – Admin – which can add and delete students in the database.

- Login scene:

The screenshot shows a window titled "School Management System" with standard Windows window controls (minimize, maximize, close). Inside the window, the word "Connected" is displayed in the top left corner. Below it, there are four input fields arranged vertically: a "Username" field, a "Password" field, a dropdown menu currently showing "select", and a "Login" button at the bottom.

2. Installation

Prerequisites

- Eclipse java
- Jdk atleast 11.
- Javafx

Install application

1. Download JAVFX from gluonHQ.
 - Go to this link <https://gluonhq.com/products/javafx/>

- Download this version of JavaFX (depend on the OS you are using, in my case it's windows)

The Release Notes for JavaFX 11 are available in the OpenJFX GitHub repository: [Release Notes](#).

This software is licensed under GPL v2 + Classpath (see <http://openjdk.java.net/legal/gplv2+ce.html>).

Product	Public version	LTS version	Platform	Download
JavaFX Windows SDK	11.0.2	11.0.10	More info Windows	Download [SHA256]
JavaFX Windows jmods	11.0.2	11.0.10	More info Windows	Download [SHA256]
JavaFX Mac OS X SDK	11.0.2	11.0.10	More info Mac	Download [SHA256]

JavaFX Documentation	11.0.2	11.0.10	More info Javadoc	Download [SHA256]

- Extract the file and get a folder like this

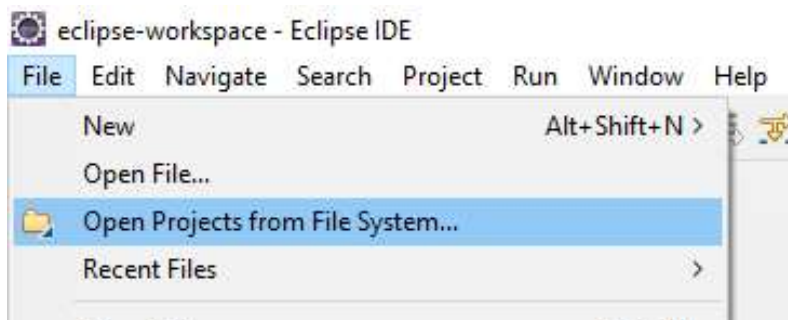

2. Download the project

- After Downloading the file, unzip the .rar file, you will have a folder like so

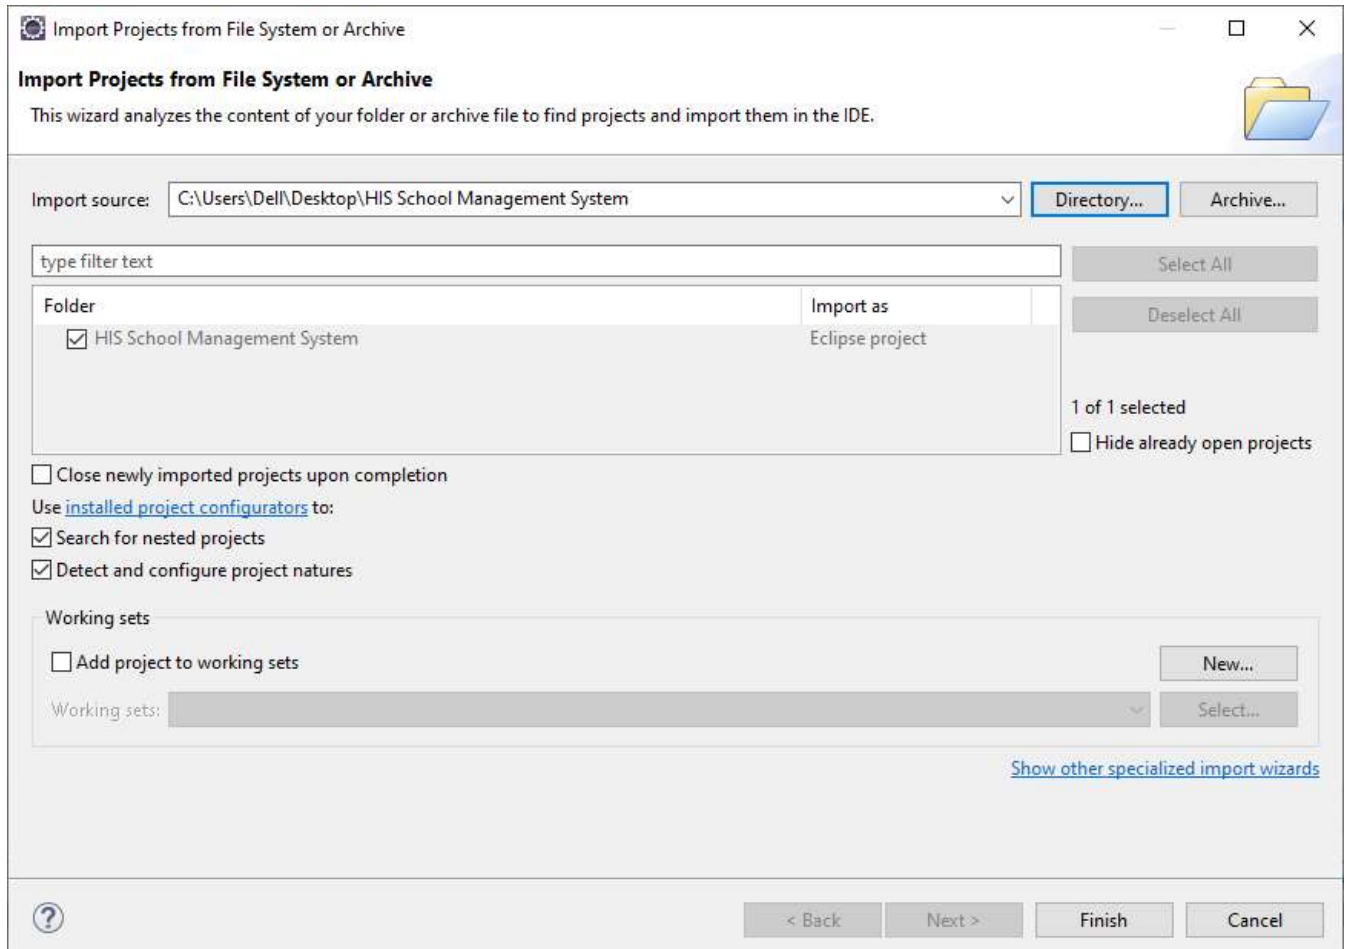

3. Open the project

- Open the Eclipse IDE, Select **File->Open Project from File System**

- Locate the **HIS School Management System** project, and then click finish

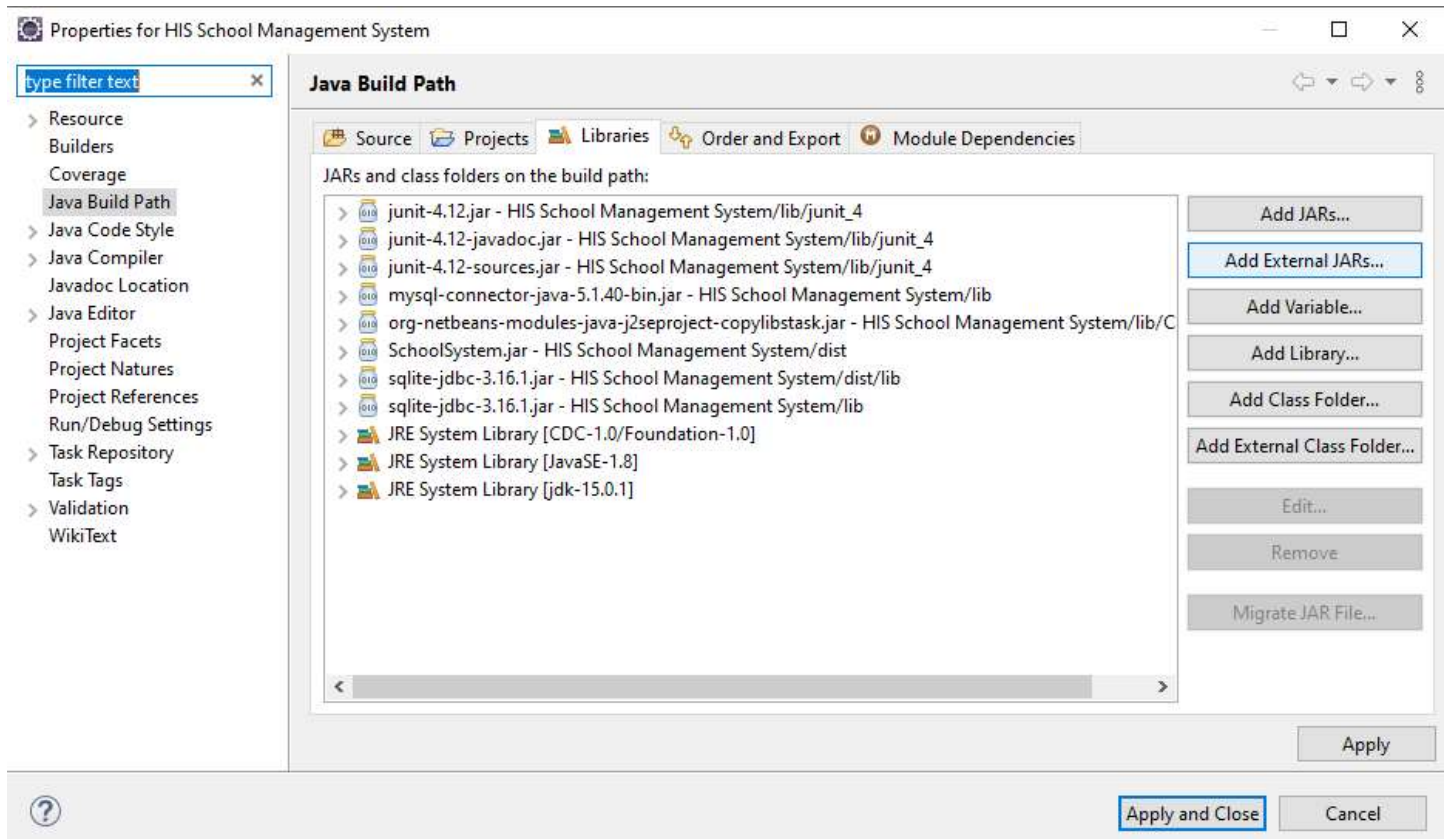

- You will see the project with missing libraries

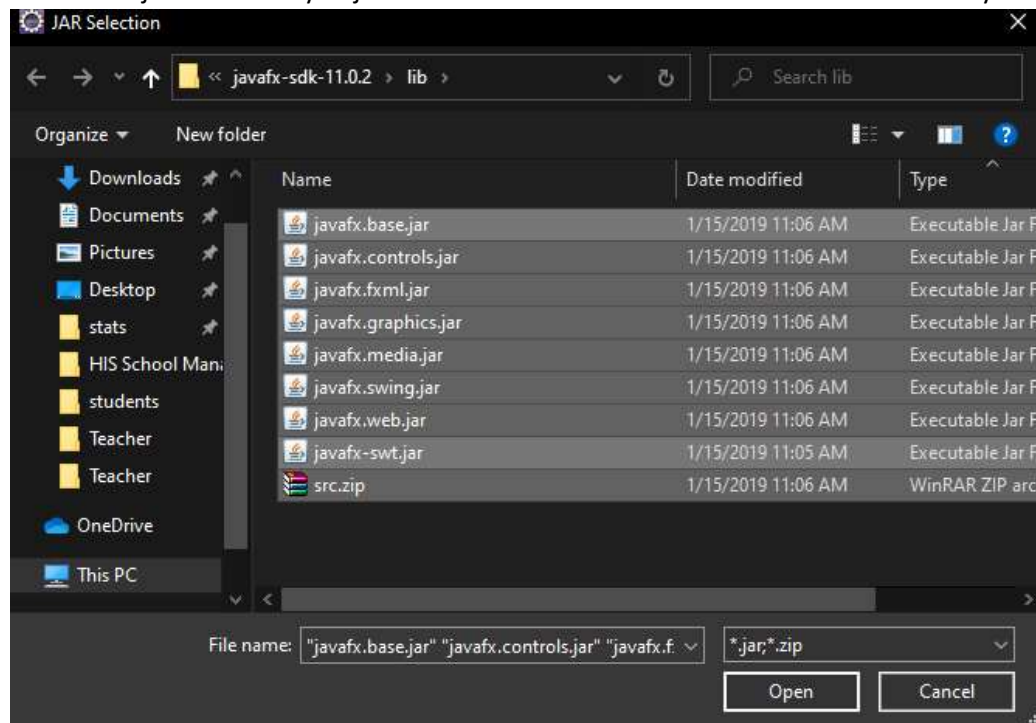

4. Adding external library

- Right click on project, select **Properties->Java Build-Path**

- Select **Add external JARs**.

- Locate the javafx folder you just download and add all the files from the **lib** library

- Click **Apply and Close**

5. Run the program
 - In the **loginApp** package, open launcher.java.
 - Click run.

3. Sample accounts.

- For student account: Username: **dfh94**, Password: **Anna**
- For Teacher account: Username: **John**, Password: **Dough**
- For admin account: Username: **Duy**, Password: **123456**
